

# Nonlinear Analysis - Applications

Nikolaos S. Papageorgiou, Vicențiu D. Rădulescu, and  
Dušan D. Repovš

Springer Monographs in Mathematics, Springer, Berlin, 2020

## **Abstract**

This is the second of two volumes and it is focused on the applications. The contents of the second volume will be divided into several thematic chapters. The book will contain a comprehensive list of references and subject index. The primary audience for this book are researchers in pure and applied nonlinear analysis and graduate students.
